

Learning Based

FINTELO is designed and developed in order to support teaching and learning in multiple markets. See how FINTELO addresses your particular needs.

features

What's Your Online Learning Environment?

See What Features FINTELO Can Offer You:

FINTELO is so easy, it allows users to concentrate on learning rather than learning a new technology.

Collaborative Learning

FINTELO encourages individuals to communicate like never before by offering synchronous and asynchronous communication options all in one system! Utilizing real-time chat and threaded discussion groups pave the way for collaboration and build a sense of community among users.

Real-time Text Chat

Each learner may join a group chat, interacting with peers in a class or workshop, engage in one-on-one dialogue, or do both simultaneously. Real-time chat facilitates meaningful conversation between and among learners about learning, as well as with teachers or trainers.

Discussion Boards

Learners utilize the Threaded Discussion Groups to communicate with their peers, teacher or trainer in an asynchronous manner – allowing learners to communicate, read and reply to their peers' posts at a time that is most convenient for them!

Learning Centered Framework Online courses, when developed most effectively, will focus on learning. For deep teaching to occur, learners construct their own learning and become "active" and fully engaged in the learning process. FINTELO's foundation rests on current teaching and learning theory, as

exemplified in FINTELO's Teaching & Learning Cycle. FINTELO guides teachers and trainers to design an online experience centered around the learner by systematically aligning tasks, assignments, and discussions to the course or workshop intended learning outcomes.

Virtual Office & Binder

FINTELO's Virtual Office consists of a bookshelf, monitor, and binder. The Virtual Office allows users to easily navigate between courses/workshops, perform many key activities within FINTELO, and visually manage all their course/workshop information via announcements, tasks, calendar, grades, and much more.

Assessment Builder & Gradebook

FINTELO's full-featured assessment builder makes it simple to construct effective and engaging assessments. FINTELO's assessments provide several means to measure what a user has learned through graphics, drag and drop, matching, multiple choice, multiple answer, true/false, ordering, fill in the blank, and essay questions. FINTELO's assessments can be manually or automatically graded in the gradebook – saving you valuable time!

Course Wizard

Creating stunning and engaging courses or workshops has never been easier. FINTELO's patented Course Wizard allows teachers and trainers to create, edit, or import courses and workshops on the fly. This leaves teachers and trainers with time to do what's needed – teach and train!

Intended Learning Outcomes

Establishing intended learning outcomes for each course or workshop, and/or lesson, provides benefits to its users. Explicitly-stated

intended learning outcomes increase learners' awareness of what's required of them, allow teachers and trainers to evaluate and enhance their own teaching and curriculum, offers common ground for organizational departments, helps meet accreditation requirements, and provides the framework for course/workshop design and revision. FINTELO incorporates learning outcomes within every lesson that then can be aligned with the course/workshop intended learning outcomes.

Reports

FINTELO's reports provide teachers and trainers with pertinent information about the performance and participation of their users – allowing them to visualize the needs of their learners – and can be used as a tool for decision making. Reports can be generated in today's most convenient formats!

Feedback

In addition to chat and threaded discussion groups, FINTELO has a feedback feature. Feedback is a great system that facilitates meaningful discussion between learners and their teachers/trainers about particular work items – what's working or not working – allowing teachers and trainers opportunities for mid-course corrections to enhance learning. FINTELO's feedback feature is available for every assignment and/or assessment.

One-Click Access

FINTELO's highly intuitive Virtual Office provides its users with "one-click access". One-click access allows users to perform a variety of functions or navigate within the software – all with one click of a mouse!
